

Current software images - EMEA

This page contains the progress status of the current software images.

v23.0

key steps:

BOM Files
verify & send to
the US

get the CRS
Server updated

check the Base
images are
working with no
issues

Check the work
instructions &
SOWs

deploy to the
repair depots &
announce

	planing	execution	testing & finalizing	reporting
steps	<p>timeline definition</p> <p>reviewing of the BOM Files</p> <p>downloading the base images from the ftp server & testing</p>	<p>connecting the HU and the CRS Server to the same network</p> <p>loading base images & customizing</p> <p>ghost image creation</p> <p>detailed steps</p> <ol style="list-style-type: none"> 1. Copy the Software Images from the WW FTP on a USB HDD 2. Boot the HU with a Ghost Boot CD 3. Select and load the Image 4. Remove the boot cd 5. Starting the OS 6. loading the contents from the CRS Server (prompt window at startup the software) 7. shutdown it down 8. create a ghost image 	<p>1 - Image creation - Preparing HDDs</p> <p>The copy of the HDDs will be handed over to the Stuttgart Software Team for final testing.</p> <p>2 finalizing</p> <p>Based on the findings of the QA team, adjustments are made and the ghost images are created.</p> <p>3 work instructions</p> <p>The work instruction for the repair depot is created with each software version.</p> <p>4 SOW - statement of work</p> <p>All changes will be communicated to the author. The SOWs must be distributed in parallel with the software images.</p> <p>5 distribution to the depots</p> <p>The ghost images are distributed to the repair centers.</p>	<p>passing to the repair depots</p> <p>announcement</p>
responsibilities	<p>Franc Kocnic</p> <p>Jose Iglesias</p> <p>James Chascha</p> <p>Serkan Celik</p>	<p>Serkan Celik</p>	<p>Software Images: Serkan Celik</p> <p>software testing: Franc Kocnic, Jose Iglesias, James Casha</p> <p>finalizing: Serkan Celik</p>	<p>Software Images: Serkan Celik</p>
